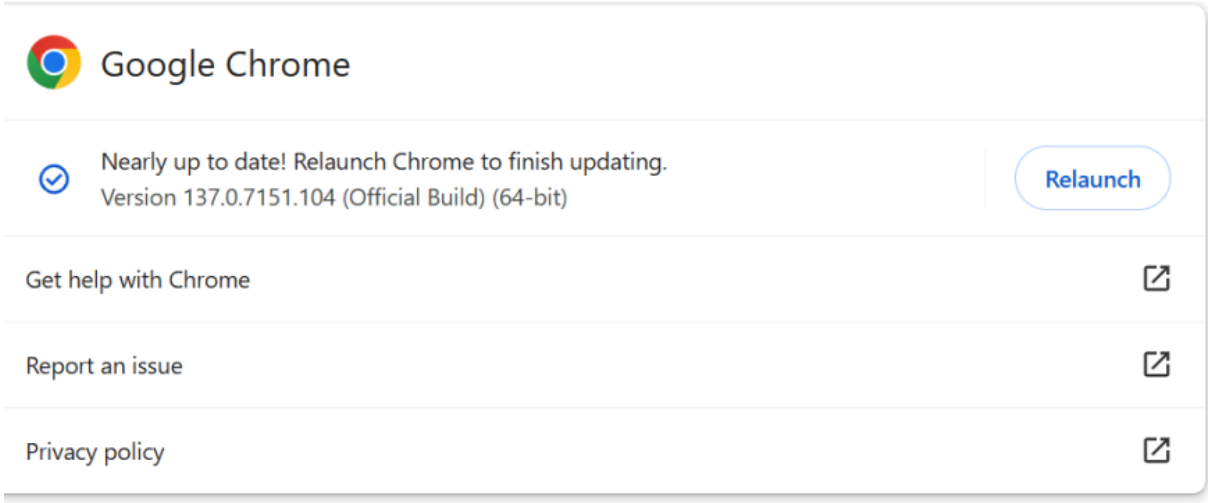
PREPARATIONS TO USE ORACLE R12.2

Step 1: Update your browser to the latest version

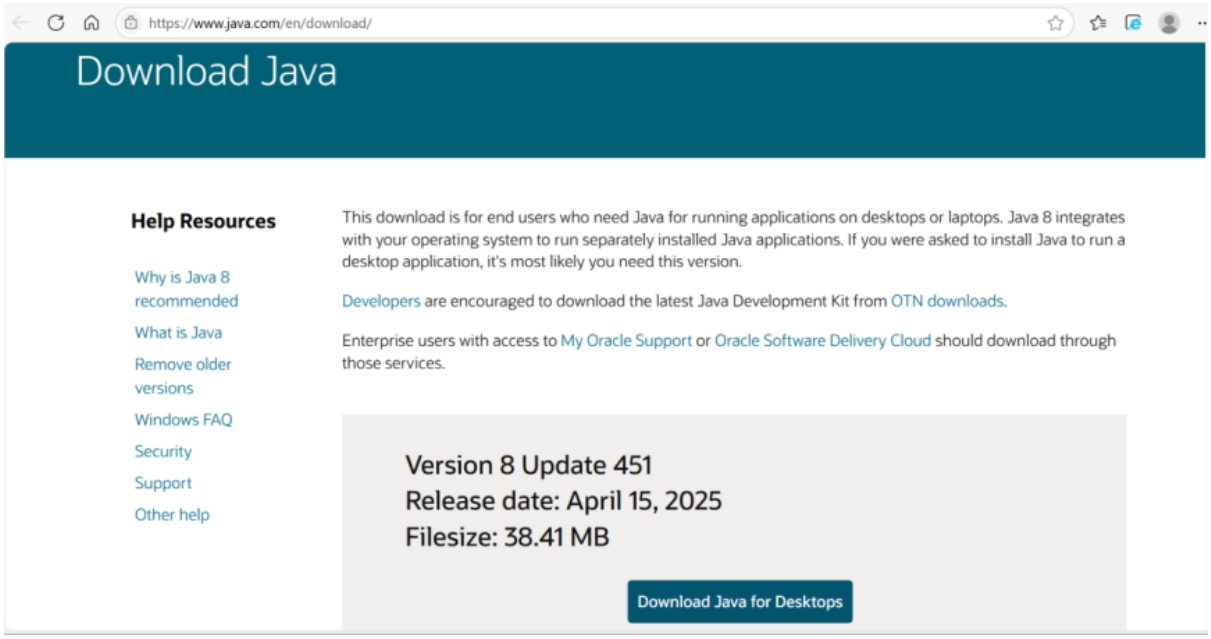
Chrome:

3-dots -> About Google Chrome
It will update your browser to the latest version, wait until the button **Relaunch** appears, and lick it.



Step 2: Install Java Runtime Environment (JRE): JRE 8 (1.8.0_371 and later)

Download JRE: https://www.java.com/download/ie_manual.jsp



Double click the downloaded file to install.

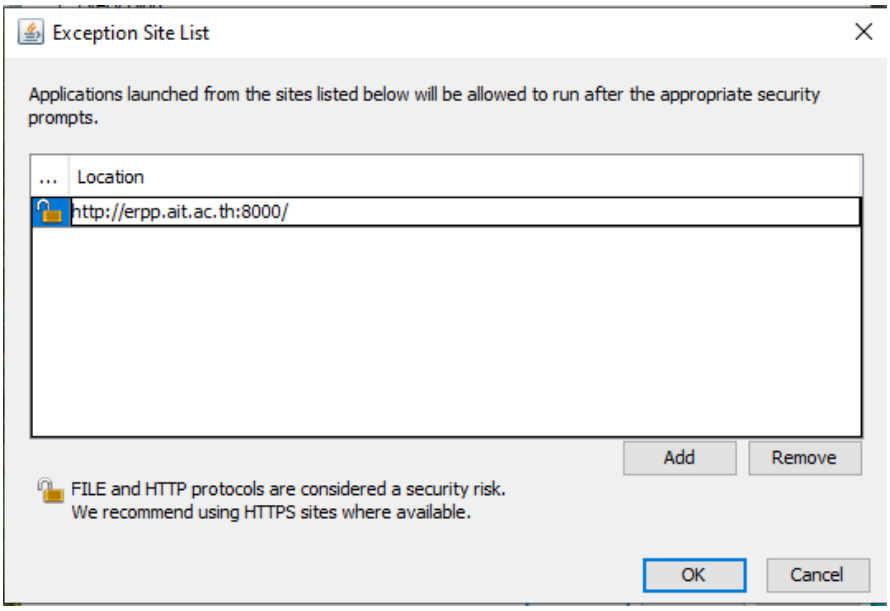
If you already installed older version of JRE, it will ask you to remove it, click the “Not now” (just in case you have other applications which require older versions of JRE).

Step 3: Setup Java Runtime Environment (JRE)

From Windows’ Search, search for “Java” and click “Configure Java”

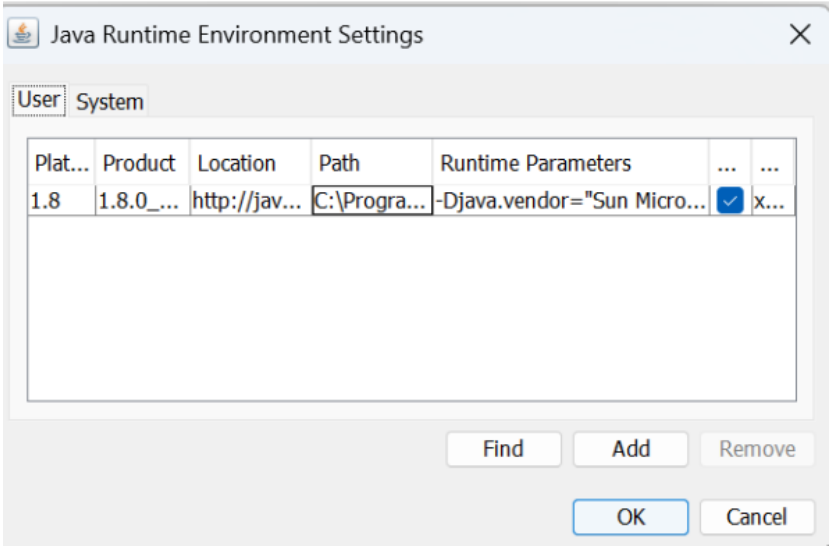
Click “Security” tab, and click “Edit Site List”

In the “Location” field, add the URL http://erpp.ait.ac.th:8000/ and then click OK



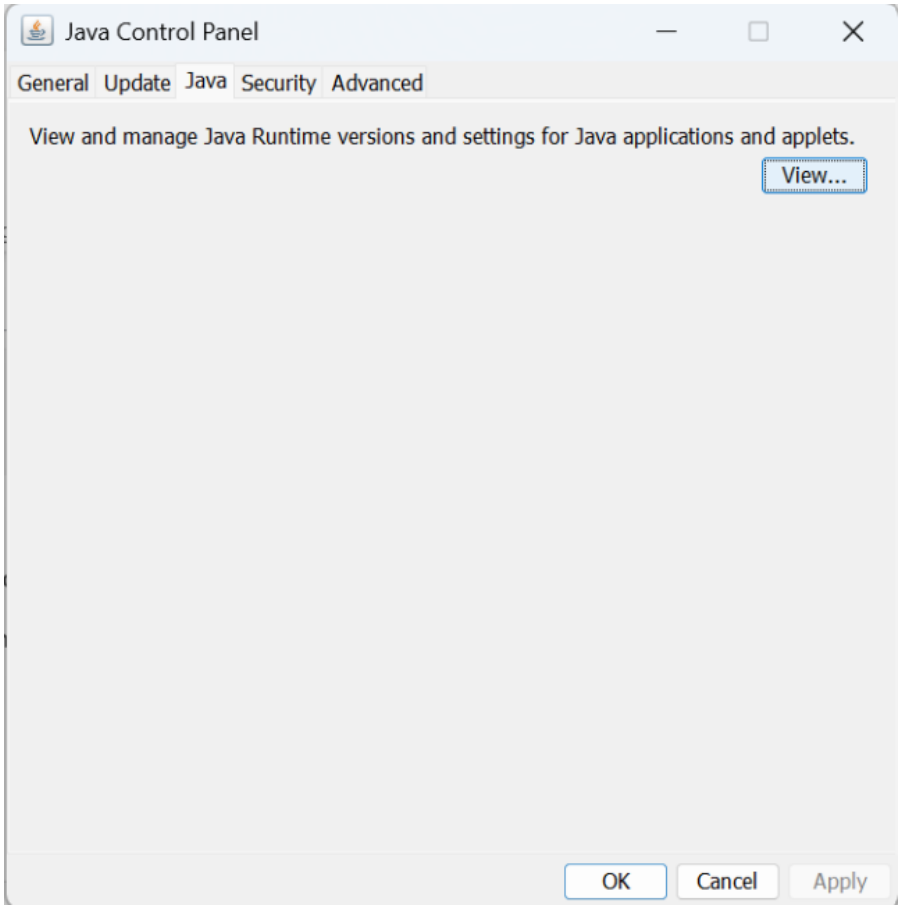
Now click “Java” tab and “View”

In the Java Runtime parameters, add -Djava.vendor="Sun Microsystems Inc."

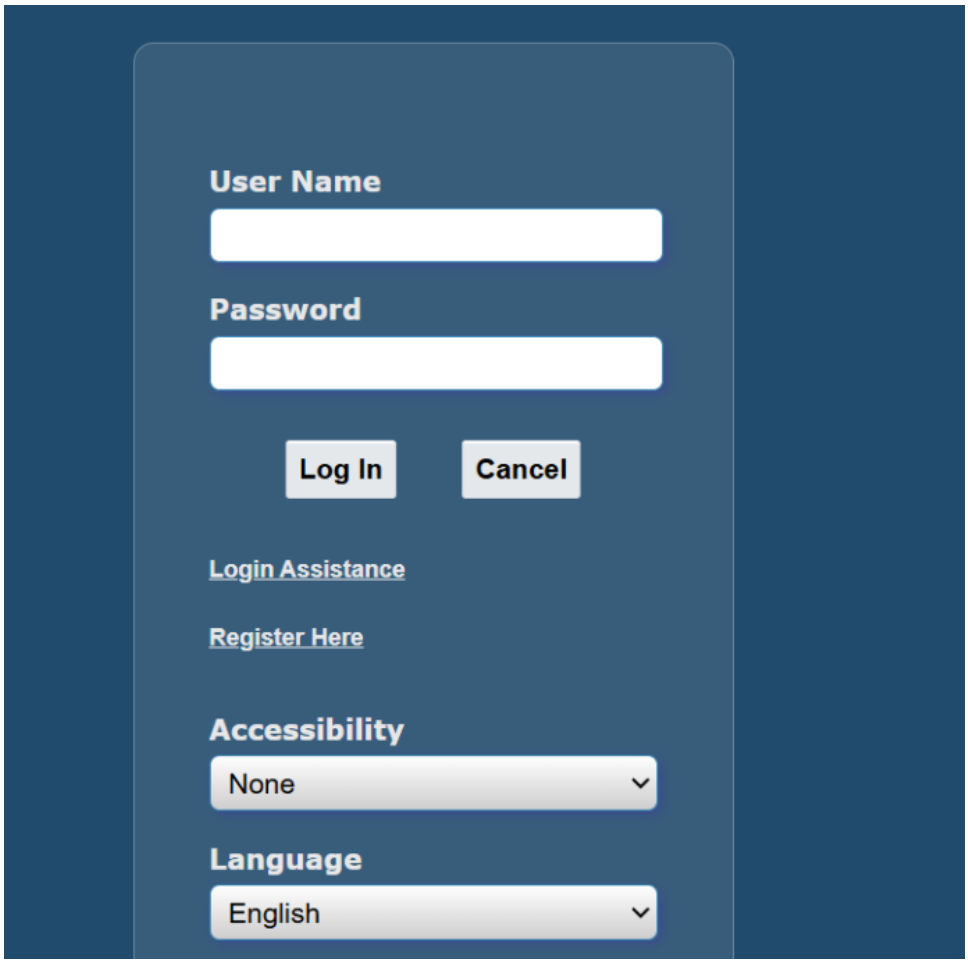


Click “Add” and click OK

From the Java Control Panel, click “Apply” and OK.



ACCESSING ERP R12.2:



If you click any menu which displays a form (such as General Ledger, Inquiry, Fund) for the first time, you will be asked to download a frmservlet.jnlp file, then open the file. Then from the next screen, click to accept and click Run.
